MST SECURITY ARCHITECTURE OVERVIEW

INTERNET

```
|
v
[Meraki MX67 - Perimeter Firewall / IDS]
| - Default deny inbound
| - IPS enabled (prevention mode)
| - URL filtering (Umbrella DNS)
|
+---> [VLAN 10 - Corporate Network (192.168.10.0/24)]
| |
| +-- MST-WS-001 through MST-WS-004 (Workstations)
| +-- MST-LT-001, MST-LT-002 (Laptops)
| +-- NAS (192.168.10.10) - CUI Storage
| +-- MST-DC-01 (Domain Controller)
|
+---> [VLAN 20 - Guest Network (192.168.20.0/24)]
| Internet only - no corp resource access
|
+---> [Azure Cloud (via encrypted VPN or HTTPS)]
- Azure AD (Identity)
- M365 (Email, SharePoint, Teams)
- Azure VMs (mst-vm-prod-001, mst-vm-prod-002)
- Azure Blob (Backup storage)
- Microsoft Sentinel (SIEM/monitoring)
```

SECURITY LAYERS IMPLEMENTED

Perimeter: Meraki MX67 firewall, IDS, URL filtering
DNS: Cisco Umbrella (malicious domain blocking)
Network: VLAN segmentation (Corp / Guest / Cloud)
Endpoint: Defender for Endpoint (EDR), BitLocker, Intune
Identity: Azure AD, MFA, PIM, Conditional Access
Data: DLP policies, Sensitivity labels, BitLocker
Monitoring: Microsoft Sentinel, Defender alerts, audit logs

LEAST PRIVILEGE VERIFICATION

Standard users: No local admin (confirmed via Intune)
CUI access: Restricted AD group (4 of 6 staff - appropriate)
Admin rights: PIM-activated JIT (Terrell Banks only)

FAIL-SAFE DEFAULTS VERIFICATION

Firewall default: DENY all (confirmed)
Software default: Block all (WDAC audit mode - moving to enforce)
Network access default: DENY (CA blocks non-compliant devices)
