MONEY STRAIGHT TALK LLC
SPLIT TUNNELING PREVENTION POLICY

=====

Document ID: POL-SC-007
Version: 1.0
Effective Date: March 5, 2026
Review Date: March 5, 2027
Owner: Terrell Banks, Systems Administrator
Approved By: Camille Odom, Managing Director

=====

1. PURPOSE

This policy prevents remote devices from simultaneously using non-remote (VPN) connections with the system and other connections to external resources (split tunneling), which could allow data to bypass security controls.

2. POLICY STATEMENT

Split tunneling is PROHIBITED for VPN connections made by MST employees and authorized users.

3. FULL-TUNNEL VPN REQUIREMENT

When connected to the MST VPN:

- ALL traffic (to company resources AND to internet) must route through the VPN tunnel
- The VPN client must be configured with "Tunnel All Traffic" or equivalent
- No direct internet access is permitted while VPN is active (all internet requests also pass through MST perimeter filtering)

4. ENFORCEMENT

Cisco AnyConnect VPN profile is configured with:

split-tunnel-policy tunnelall

This prevents the client from allowing split tunneling regardless of client-side settings.

5. MONITORING

Any VPN client attempting to establish split tunnel connections will be denied by the VPN gateway.

Terrell Banks reviews VPN configuration quarterly.

6. CLOUD SERVICES

For direct cloud services (M365), Conditional Access requires Intune-compliant devices, providing equivalent security even when not on VPN (Defender always active).
