MONEY STRAIGHT TALK LLC
USER ACTIVITY TRACEABILITY POLICY

=====

Document ID: POL-AU-002
Version: 1.0
Effective Date: January 20, 2026
Review Date: January 20, 2027
Owner: Terrell Banks, Systems Administrator
Approved By: Camille Odom, Managing Director

=====

1. PURPOSE

This policy ensures that all individual user actions on MST information systems can be uniquely traced to the user who performed them, supporting accountability and incident investigation.

2. REQUIREMENTS

2.1 Unique User Accounts

- Every user must have an individual, non-shared account
- Shared or generic accounts (admin, test, user1) are prohibited
- Service accounts are named by function and their use is restricted to automated processes only

2.2 Audit Logging

All systems log the following user-attributable events:

- Logon / logoff (with username, timestamp, source IP)
- File access, modification, deletion (with username)
- Privilege escalation (with username and method)
- Account creation, modification, deletion
- Security policy changes

2.3 Log Integrity

- Logs are written to Microsoft Sentinel (cloud-based SIEM)
- Users cannot modify or delete their own audit logs
- Log storage: Azure Log Analytics (1-year retention)

3. SHARED ACCOUNT PROHIBITION

No shared accounts are permitted. If a role requires multiple people to perform a task, each person uses their own account and the results are attributed to them.

4. SERVICE ACCOUNTS

Service account activity is logged and reviewed monthly. Humans do not log in interactively using service accounts.
