MONEY STRAIGHT TALK LLC
SYSTEM CLOCK SYNCHRONIZATION POLICY

=====

Document ID: POL-AU-007
Version: 1.0
Effective Date: January 22, 2026
Review Date: January 22, 2027
Owner: Terrell Banks, Systems Administrator
Approved By: Camille Odom, Managing Director

=====

1. PURPOSE

This policy requires that all MST information system clocks are synchronized to a reliable, authoritative time source to ensure audit log timestamps are accurate and consistent.

2. TIME SYNCHRONIZATION REQUIREMENTS

2.1 Time Source

- Primary NTP source: time.windows.com (Microsoft)
- Secondary NTP source: pool.ntp.org
- All domain-joined systems sync time from the domain controller (DC) which syncs from the above sources

2.2 Allowed Clock Drift

- Maximum allowed drift: 5 minutes from NTP source
- Systems exceeding 5 minutes of drift generate an alert
- Systems with excessive drift are investigated promptly

2.3 Cloud Resources

- Azure VMs sync time from Azure infrastructure (Hyper-V) which is synchronized to Microsoft time servers
- Azure platform time is accurate to within milliseconds

3. ENFORCEMENT

Windows Time Service (W32tm) is configured via GPO to enforce NTP synchronization. Service is set to automatic start and cannot be disabled by users.

4. MONITORING

Terrell Banks checks system time accuracy quarterly via w32tm /query /status on all servers and domain controllers.
