MONEY STRAIGHT TALK LLC  
SECURITY IMPACT ANALYSIS POLICY

=====

Document ID: POL-CM-004  
Version: 1.0  
Effective Date: January 25, 2026  
Review Date: January 25, 2027  
Owner: Terrell Banks, Systems Administrator  
Approved By: Camille Odom, Managing Director

=====

1. PURPOSE

This policy requires that the security impact of proposed changes to MST information systems is analyzed before implementation.

2. WHEN ANALYSIS IS REQUIRED

Security impact analysis is required for all Normal and Emergency changes to:

- Operating system configurations
- Security software configurations
- Network device configurations (firewall, VPN, switches)
- Applications that process CUI
- Access control settings (user permissions, group policies)
- Cryptographic configurations

3. ANALYSIS PROCESS

For each change, Terrell Banks must document:

- a) Description of the change
- b) Systems and data affected
- c) Security controls that may be affected
- d) Potential negative security impacts (if any)
- e) Compensating controls or rollback plan (if negative impacts)
- f) Whether the change introduces new attack surface
- g) Recommendation: APPROVE / DEFER / REJECT

4. APPROVAL

Camille Odom reviews the security impact analysis before approving Normal and Emergency changes.

5. DOCUMENTATION

Security impact analysis is documented in the Change Request ticket in the IT ticketing system.

Analysis is retained with the change record for 3 years.
