MONEY STRAIGHT TALK LLC
SECURITY IMPACT ANALYSIS - SAMPLE CHANGE RECORDS
Evidence for CMMC Control 3.4.4

=====

Report Date: July 23, 2026
Prepared By: Terrell Banks

=====

CHG-2026-061 - Security Impact Analysis

Change: Enable Windows Defender Credential Guard on
all MST workstations
Date: June 15, 2026
Analyzed By: Terrell Banks

Affected Systems: MST-WS-001 through MST-WS-004
Affected Controls: IA (credential protection), SI (malware)

Security Impact Assessment:

Positive Impacts:

- Prevents credential theft (Pass-the-Hash attacks)
- Isolates LSASS in virtualization-based security container
- Reduces risk from credential-dumping malware

Potential Negative Impacts:

- Some legacy authentication protocols may fail
(Kerberos unconstrained delegation - not used at MST)
- Requires TPM 2.0 (all MST devices have TPM 2.0 - verified)
- Performance overhead: minimal (<2% per Microsoft docs)

Rollback Plan: Disable via GPO if critical issues arise

New Attack Surface Introduced: NONE

Recommendation: APPROVE

Approval: Camille Odom - June 15, 2026 - APPROVED

Implemented: June 16, 2026 - SUCCESS

CHG-2026-072 - Security Impact Analysis

Change: Allow contractor guest user access to
SharePoint project site (one specific site)
Date: July 7, 2026
Analyzed By: Terrell Banks

Security Impact Assessment:

Positive: Enables collaboration with authorized contractor

Negative: External user gains read access to project docs

CUI Risk: Project site contains CUI - HIGH RISK

Compensating Controls Required:

- Limit to specific non-CUI project folder only
- Guest access expires in 30 days
- DLP policy blocks CUI download by guests

Recommendation: APPROVE WITH RESTRICTIONS

Approval: Camille Odom - July 7, 2026 - APPROVED with limits

Implemented: July 8, 2026 - Guest access to non-CUI folder only.
