MONEY STRAIGHT TALK LLC
MULTI-FACTOR AUTHENTICATION FOR ALL USERS POLICY

=====

Document ID: POL-IA-006
Version: 1.0
Effective Date: January 30, 2026
Review Date: January 30, 2027
Owner: Terrell Banks, Systems Administrator
Approved By: Camille Odom, Managing Director

=====

1. PURPOSE

This policy requires multi-factor authentication for network access to MST systems by both privileged and non-privileged accounts.

2. MFA REQUIREMENT - ALL USERS

MFA is required for all MST users when accessing:

- Microsoft 365 (email, Teams, SharePoint, OneDrive)
- Azure AD-protected resources
- VPN (remote access to company network)
- Any cloud-based application integrated with Azure AD SSO

3. ACCEPTABLE MFA METHODS

- Microsoft Authenticator push notification (recommended)
- TOTP authenticator code (backup method)
- SMS text message: NOT permitted (SIM swap risk)
- Voice call: NOT permitted
- Email OTP: NOT permitted

4. MFA ENROLLMENT

- All new employees must enroll MFA before their first logon to company systems (Terrell Banks sets up during onboarding)
- MFA enrollment is confirmed in the MST User Checklist

5. MFA EXCEPTIONS

- No MFA exceptions are permitted for users with access to CUI
- Break-glass account: uses FIDO2 hardware key only

6. MONITORING

Terrell Banks reviews MFA registration monthly.
Any user found without MFA is immediately reported to Camille Odom and MFA is enforced before further access.
