MONEY STRAIGHT TALK LLC
MEDIA SANITIZATION AND DISPOSAL POLICY

=====

Document ID: POL-MP-003
Version: 1.0
Effective Date: February 10, 2026
Review Date: February 10, 2027
Owner: Terrell Banks, Systems Administrator
Approved By: Camille Odom, Managing Director

=====

1. PURPOSE

This policy requires that system media is properly sanitized or destroyed before disposal or reuse to prevent unauthorized disclosure of CUI.

2. SANITIZATION METHODS BY MEDIA TYPE

2.1 SSDs and Flash Storage (Internal and USB)

Method: Cryptographic Erase (preferred)

- For BitLocker-encrypted drives: destroy the BitLocker recovery key; the drive data is unreadable
- For drives supporting ATA Secure Erase: issue secure erase command via manufacturer tool

Method: Physical Destruction (if cryptographic erase fails)

- Degaussing (ineffective on SSDs - use shredding)
- Physical shredding at an approved facility (NAID-certified preferred)

2.2 HDDs (Magnetic)

Method: DoD 3-pass overwrite (DBAN or equivalent)

OR: Degaussing + physical puncture for high-sensitivity media

2.3 Paper Documents Containing CUI

Method: Cross-cut shredding (Level P-4 or higher)

MST has a cross-cut shredder on-site (Fellowes LX221)

Shredding is performed immediately upon document end-of-life

3. REUSE OF MEDIA

Before reusing any media that previously held CUI, the above sanitization must be performed and documented.

4. DOCUMENTATION

All media sanitizations are logged in the Media Sanitization Log (SharePoint: IT/MP-Sanitization-Log.xlsx).

5. CERTIFICATE

For off-site destruction, a Certificate of Destruction is obtained and filed with the sanitization log.
