SANITIZATION EVENTS - 2026

EVENT #1 - February 20, 2026
Device: MST-WS-002 (old machine - replaced)
Media: 500 GB HDD (Seagate)
Sanitization: DBAN 3-pass overwrite (DoD 5220.22-M)
Method Reference: NIST SP 800-88 Rev 1 - Clear (HDD)
Tool Used: DBAN (Darik's Boot and Nuke) v2.3.0
Duration: 4 hours 22 minutes
CUI on device: YES (Terrell Banks' work files)
Performed By: Terrell Banks
Outcome: Sanitization complete. Drive disposed in
general recycling (no data recoverable).
Documentation: DBAN completion report printed and filed.

EVENT #2 - April 15, 2026
Device: USB flash drive (unencrypted, found in drawer)
Media: SanDisk 32 GB (unknown history/ownership)
Sanitization: Physical destruction - punctured drive PCB
with hammer and drill (NIST SP 800-88 Destroy)
Reason: Could not confirm whether drive contained CUI;
elected to destroy as precautionary measure.
Performed By: Terrell Banks
Outcome: Drive destroyed. Fragments disposed in trash.

EVENT #3 - June 30, 2026
Device: MST-LT-001 (end of lease return)
Media: 512 GB NVMe SSD (BitLocker encrypted)
Sanitization: Cryptographic Erase - BitLocker key destroyed
via manage-bde -forcerecovery (key overwritten)
Followed by: Full BitLocker wipe to new key,
then recovery key deleted again.
Method Reference: NIST SP 800-88 Rev 1 - Purge (cryptographic erase)
Performed By: Terrell Banks
Outcome: Device returned to leasing company.
Certificate: Obtained from Dell Lease Return (CoD #DELL-2026-9921)

PAPER SHREDDING - ONGOING
Shredder (Fellowes LX221): Used weekly for CUI paper documents.
Monthly log maintained. Last entry: July 22, 2026.
